**A Revolution Down on the Farm** Feb 24 2021 At a time when food is becoming increasingly scarce in many parts of the world and food prices are skyrocketing, no industry is more important than agriculture. Humans have been farming for thousands of years, and yet agriculture has undergone more fundamental changes in the past 80 years than in the previous several centuries. In 1900, 30 million American farmers tilled the soil or tended livestock; today there are fewer than 4.5 million farmers who feed a population four times larger than it was at the beginning of the century. Fifty years ago, the planet could not have sustained a population of 6.5 billion; now, commercial and industrial agriculture ensure that millions will not die from starvation. Farmers are able to feed an exponentially growing planet because the greatest industrial revolution in history has occurred in agriculture since 1929, with U.S. farmers leading the way. Productivity on American farms has increased tenfold, even as most small farmers and tenants have been forced to find other work. Today, only 300,000 farms produce approximately ninety percent of the total output, and overproduction, largely subsidized by government programs and policies, has become the hallmark of modern agriculture. *A Revolution Down on the Farm: The Transformation of American Agriculture since 1929* charts the profound changes in farming that have occurred during author Paul K. Conkin's lifetime. His personal experiences growing up on a small Tennessee farm complement compelling statistical data as he explores America's vast agricultural transformation and considers its social, political, and economic consequences. He examines the history of American agriculture, showing how New Deal innovations evolved into convoluted commodity programs following World War II. Conkin assesses the skills, new technologies, and government policies that helped transform farming in America and suggests how new legislation might affect farming in decades to come. Although the increased production and mechanization of farming has been an economic success story for Americans, the costs are becoming increasingly apparent. Small farmers are put out of business when they cannot compete with giant, non-diversified corporate farms. Caged chickens and hogs in factory-like facilities or confined dairy cattle require massive amounts of chemicals and hormones ultimately ingested by consumers. Fertilizers, new organic chemicals, manure disposal, and genetically modified seeds have introduced environmental problems that are still being discovered. *A Revolution Down on the Farm* concludes with an evaluation of farming in the twenty-first century and a distinctive meditation on alternatives to our present large scale, mechanized, subsidized, and fossil fuel and chemically dependent system.

**Bet the Farm** Jan 18 2023 "Eloquent and detailed...precise and well-thought-out...Read her book — and listen." — Jane Smiley, *The Washington Post*. Beth Hoffman was living the good life: she had a successful career as a journalist and professor, a comfortable home in San Francisco, and plenty of close friends and family. Yet in her late 40s, she and her husband decided to leave the big city and move to his family ranch in Iowa—all for the dream of becoming a farmer, to put into practice everything she had learned over decades of reporting on food and agriculture. There was just one problem: money. Half of America's two million farms made less than \$300 in 2019. Between rising land costs, ever-more expensive equipment, the growing uncertainty of the climate, and few options for health care, farming today is a risky business. For many, simply staying afloat is a constant struggle. *Bet the Farm* chronicles this struggle through Beth's eyes as a beginning farmer. She must contend with her father-in-law, who is reluctant to hand over control of the land. Growing oats is good for the environment but ends up being very bad for the wallet. And finding somewhere, in the midst of COVID-19, to slaughter grass-finished beef is a nightmare. The couple also must balance the books, hoping that farming isn't a romantic fantasy that takes every cent of their savings. Even with a decent nest egg and access to land, making ends meet at times seems impossible. And Beth knows full well that she is among the privileged. If Beth can't make it, how can farmers who confront racism, lack access to land, or don't have other jobs to fall back on? *Bet the Farm* is a first-hand account of the perils of farming today and a personal exploration of more just and sustainable ways of producing food.

**On the Farm** Feb 19 2023 Veteran investigative journalist Stevie Cameron first began following the story of missing women in 1998, when the odd newspaper piece appeared chronicling the disappearances of drug-addicted sex trade workers from Vancouver's notorious Downtown Eastside. It was not until February 2002 that pig farmer Robert William Pickton would be arrested, and 2008 before he was found guilty, on six counts of second-degree murder. These counts were appealed and in 2010, the Supreme Court of Canada rendered its conclusion. The guilty verdict was upheld, and finally this unprecedented tale of true crime could be told. Covering the case of one of North America's most prolific serial killers gave Stevie Cameron access not only to the story as it unfolded over many years in two British Columbia courthouses, but also to information unknown to the police - and not in the transcripts of their interviews with Pickton - such as from Pickton's long-time best friend, Lisa Yelds, and from several women who survived terrifying encounters with him. Cameron uncovers what was behind law enforcement's refusal to believe that a serial killer was at work.

**Betting on the Farm** Dec 05 2021 Japan Agricultural Cooperatives (JA), a nationwide network of farm cooperatives, is under increasing pressure to expand farmer incomes by adapting coop strategies to changing market incentives. Some coops have adapted more successfully than others. In *Betting on the Farm*, Patricia L. Maclachlan and Kay Shimizu attribute these differences to three sets of local variables: resource endowments and product-specific market conditions, coop leadership, and the organization of farmer-members behind new coop strategies. Using in-depth case studies and profiles of different types of farmers, *Betting on the Farm* also explores the evolution of the formal and informal institutional foundations of postwar agriculture; the electoral sources of JA's influence; the interactive effects of economic liberalization and demographic pressures (an aging farm population and acute shortage of farm successors) on the propensity for change within the farm sector; and the diversification of Japan's traditional farm households and the implications for farmer ties with JA.

*A Night at the Farm* Oct 03 2021 A quirky bedtime story about an eclectic cast of miniature farm animals and what they get themselves into while the farmer is fast asleep. After a long day of work, the farmer has gone to bed. But for her farm animals, the party is just getting started. While the farmer sleeps, the cows steal her truck to go to the moo-vies, the pigs pamper themselves, and the goats put on a midnight fashion show. This photographic book of miniatures depicts the mischief the farm animals get into in this adorable bedtime book.

*Creating Humus on the Farm* Jan 26 2021 In *Creating Humus on the Farm*, compost master Roland Ulrich shares practical, step-by-step methodology to transform barnyard compost to humus. The controlled heat method of composting, compared with other methods, will save time, preserve more nutrients, and ultimately create greater quantities of stable humus to add to your fields. Living humus is the best and most natural way to fertilize soil. Dead chemical fertilizers cause deterioration of the soil which in turn impacts the quality of food production. Loss of humus can lead to soil erosion, water shortages, water pollution, and land loss. Farmers are in a unique position to make invaluable contributions to the health and vitality of our soils, and consequently to the nutrition we receive from our plants and animals. Whether you are already part of the organic agricultural movement or are just starting to explore the real benefits of soil conservation, you have the choice to be a mindful steward of the earth. *Creating Humus on the Farm* is a uniquely valuable resource.

*Fostering on the Farm* Jun 30 2021 From 1870 until after World War I, reformers led an effort to place children from orphanages, asylums, and children's homes with farming families. The farmers received free labor in return for providing room and board. Reformers, meanwhile, believed children learned lessons in family life, citizenry, and work habits that institutions simply could not provide. Drawing on institution records, correspondence from children and placement families, and state reports, Megan Birk scrutinizes how the farm system developed--and how the children involved may have become some of America's last indentured laborers. Between 1850 and 1900, up to one-third of farm homes contained children from outside the family. Birk reveals how the nostalgia attached to misplaced perceptions about healthy, family-based labor masked the realities of abuse, overwork, and loveless upbringings endemic in the system. She also considers how rural people cared for their own children while being bombarded with dependents from elsewhere. Finally, Birk traces how the ills associated with rural placement eventually forced reformers to transition to a system of paid foster care, adoptions, and family preservation.

*The Farm Bill* May 18 2020 "Daniel Imhoffs recently-published *The Farm Bill: A Citizens Guide* [is] a welcome and much-needed source for translating farm bill legalese ... [it is] a thorough and navigable history of the farm bill ... [that] hands readers the tools to take action." Foodprint "Dan Imhoff does an extraordinary job of explaining an impenetrable bill with such clarity that we can't ignore the facts: that our current Farm Bill profoundly damages our organic farms, our environment, and our health. Just as extraordinary are the practical solutions Imhoff proposes for fixing the bill--humane policies that would support regenerative agriculture and our local farmers instead of tearing them down." Alice Waters, Executive Chef, Founder, and Owner, Chez Panisse "Cuts to the core of dozens of issues Congress wrestles with every four years, and gives citizens sage advice for making their voices heard in a debate too often dominated by Big Ag, Big Food, and Big Money." Ken Cook, President and Cofounder, Environmental Working Group "A must-read for those who truly care about how they feed themselves and their families." Michel Nischan, Founder and CEO, Wholesome Wave "Readers will gain deep insight into the big barriers to Farm Bill reform, but also into the ripening opportunities for major change. Imhoff makes a strong case for why we should care and what it will take to transform policy." Ferd Hoefner, Strategic Senior Advisor, National Sustainable Agriculture Coalition "Dan Imhoff is the go-to person if you want to know both details and the full sweep of the Farm Bill." Wes Jackson, President Emeritus, The Land Institute.
