1 Esdras Nov 04 2021 1 Esdras is an alternative version of the book of Ezra-Nehemiah in the Septuagint. Most Eastern Orthodox churches accord the book canonical status. This is the first commentary on 1 Esdras based on the critical text of the Göttingen Septuagint edition. It understands 1 Esdras not simply as a fragment of the Chronistic history or as merely a compilation, but rather as a coherent narrative. Its interpretation as a literary work and the reconstruction of its composition take into account both the historical backgrounds of the narrative setting of the Persian period and the historical location of the composition in the Hasmonaean period. 1 Esdras is currently enjoying a period of renewed attention in scholarship. Its relationship to Ezra-Nehemiah is seen as a prime example of literary-historical developments in Israel.

The Holy Bible "Chronicle" of Sequential Biblical Events Dec 25 2020 Most of us have wondered, sometime during our lifetime, about when Adam and Eve were really "expelled from paradise" in the Garden of Eden. "Can" we find a verifiable and replicable answer to this question? Most of us have questioned, sometime during our lifetime, the "accepted" sequential biblical timeline of Archbishop James Ussher who claimed that 4004 BC was the actual date for that initial biblical event in our current holy scriptures. Was he right? Most of us have questioned, sometime in our lifetime, how the Hebrew's "accepted" claim that 3761 BC could be the actual date for Adam's "expulsion." Were they right? "Can" we find a way to reconstruct the complete Hebrew Bible timeline, from Adam's "expulsion" from paradise to our day? Is this possible? Who believes that it can be done? Well, it has been done! Here, is how it is done! To reconstruct the Hebrew Bible timeline, we need to know only the simple math formula that they used! The employment of this simple formula shall enable us to rebuild that same sequential biblical timeline, block by block, in the exact same fashion that the Jewish people "use from the beginning," at Adam's "expulsion" from paradise, in the Garden of Eden. The formula used in reconstructing an "actual count" of the Hebrew Bible is found below: $7 \times 49 \times 10 = 490 \times 10 = 4,900$ solar years $7 \times 49 + 1 = 50 \times 10 = 500 \times 10 = 5,000$ lunar years Since both of these 49 solar, and 50 lunar, periods of time contain 18,200 days (approx), we can then "post the number" of any given sequential biblical event in its designated year position on a side-by-side comparison chart. If we "post the number" in this fashion, it will show us exactly when and where, on the timeline chart, there is an error in the sequential computations of any sequential biblical event that is propounded by any biblical chronologist, past or present! In this present book, we find that the Ussher biblical timeline is 112 years "too early." And the Hebrew biblical timeline of Codex Judaica is 131 years "too late." Obviously, 3892 BC is the only "year number" that can work for a verifiable timeline! This book, "The Holy Bible "Chronicle" of Sequential Biblical Events," by Robert P. Killian, is the fruit of over seventy-year search for that verifiable and replicable answer to the long-sought question: "Can the Ussher biblical timeline be trusted?"
