The Omnitrix has been replaced by the even more powerful Ultimatrix and Ben's a little bit older now – but he's still turning alien to destroy villains and help keep the good folks in the galaxy safe from harm! It's a tall order, so Ben's really glad that he still has Gwen and Kevin (and their amazing powers) by his side. And Ben now has newer and even more AWESOME aliens than ever! So come and be reunited with some old friends and foes – and meet some new ones, too! Check out the alien facts, brain-busting puzzles and the epic comic strip. 'The Dandy Annual' has been a tradition since the 1930s and is now as much a part of Christmas as turkey. Old favourites you'll remember, like Desperate Dan and Beryl the Peril, appear alongside new names like Jak and Ollie Fliptrik. The 2013 Pfeiffer Training Annual The Leader in Resources for Training & HR Professionals for the Past Four Decades Experiential Learning Activities Instruments Articles For more than 40 years, The Pfeiffer Annuals have helped professionals in the workplace learning and performance field to stay ahead of their organizations' needs. The 2013 Pfeiffer Training Annual is no exception. It offers a hands-on guide to the latest thinking and approaches to training and development. To address the need for leadership development, the Annual presents a "Preparing Leaders for the Future" theme, with valuable information on such practical topics as improving learning and performance, exploring skills of successful leaders, the supervisor's motivational tool kit, and much more. ELAs are presented as complete, ready-to-use training designs. This year in the Editor's Choice section Karl Albrecht shares his ideas for thinking more clearly, creatively, and cleverly and Lou Russell offers a real-world activity that helps participants see how they contribute to the stress and frustration of their work day. Use the articles section for your own professional development or as a lecture resource within your training sessions. Must-haves in this section include articles by Catherine Rezak, Homer H. Johnson, and Leonard D. Goodstein. With the depth and breadth of resources, the

Annual content is entirely new each year, ensuring a steady stream of contemporary knowledge and tools. Use the Annual to stay on top of developments within the profession, dip into the content for a contribution that targets a specific performance need, or to develop a complete program, and learn how others in the field are tackling the ever-increasing challenges of developing a capable, productive workforce. The 2013 Pfeiffer Consulting Annual The Leader in Resources for Consultants for the Past Four Decades Experiential Learning Activities Instruments Articles For more than 40 years, The Pfeiffer Annuals have helped consultants, experts, and academics in the field to stay informed and ahead of the curve. The 2013 Pfeiffer Consulting Annual is a toolkit of ideas, methods, techniques, and models that support your work as an internal or external organizational consultant. It addresses the broad range of topics that are of most interest to professionals in the field. The materials provide accessible means of interacting with a diverse variety of systems and processes—from collaborative workflows and executive coaching to strategic planning and organizational development. This Annual puts the focus on preparing leaders for the future. Leader preparation is a topic that permeates our organizations and pervades all that you do as professionals in the learning and consulting arena. Developing leaders for the future is no longer simply a matter of cultivating a pre-defined set of skills. The Pfeiffer Annuals can help you give new leaders all the tools they need to face an uncertain future. Experiential Learning Activities (ELAs) cover a broad range of consulting topics. The activities are presented as ready-to-use designs for working with groups: facilitator instructions and all necessary handouts are included. ELAs showcasing the theme including: conflict assessment, making difficult decisions, setting important goals, and managing stress. The Inventories, Questionnaires, and Surveys section contains tools to help respondents take an objective look at themselves or their organizations and determine how a particular

theory applies to their situations. Don't miss the assessing readiness for a mentoring partnership in this section. The articles section presents the current thinking about workplace communications, leadership, and individual development. Beverly Kay, Hank Karp, Mohandas Nair, Vince Rogers, Rick Maurer, and Jeanette Goodstein contributed must-read articles. The article by Jo Lynn Feinstein highlights the topic of strategic leadership which is an essential issue for almost every organization. Year after year, the Consulting Annual has provided thousands of professionals with up-to-date information and tools to make organizations more effective. Delve into this volume and you will understand why it is the most reliable source for practical, professional, performance-boosting tools and fresh ideas.

The leaf is an organ optimized for capturing sunlight and safely using that energy through the process of photosynthesis to drive the productivity of the plant and, through the position of plants as primary producers, that of Earth's biosphere. It is an exquisite organ composed of multiple tissues, each with unique functions, working synergistically to: (1) deliver water, nutrients, signals, and sometimes energy-rich carbon compounds throughout the leaf (xylem); (2) deliver energy-rich carbon molecules and signals within the leaf during its development and then from the leaf to the plant once the leaf has matured (phloem); (3) regulate exchange of gasses between the leaf and the atmosphere (epidermis and stomata); (4) modulate the radiation that penetrates into the leaf tissues (trichomes, the cuticle, and its underlying epidermis); (5) harvest the energy of visible sunlight to transform water and carbon dioxide into energy-rich sugars or sugar alcohols for export to the rest of the plant (palisade and spongy mesophyll); and (6) store sugars and/or starch during the day to feed the plant during the night and/or acids during the night to support light-driven photosynthesis during the day (palisade and spongy mesophyll). Various regulatory controls that have been shaped through the evolutionary history of each plant species result in an incredible diversity of leaf form

across the plant kingdom. Genetic programming is also flexible in allowing acclimatory phenotypic adjustments that optimize leaf functioning in response to a particular set of environmental conditions and biotic influences experienced by the plant. Moreover, leaves and the primary processes carried out by the leaf respond to changes in their environment, and the status of the plant, through multiple regulatory networks over time scales ranging from seconds to seasons. This book brings together the findings from laboratories at the forefront of research into various aspects of leaf function, with particular emphasis on the relationship to photosynthesis. The highlights of the 2012 and 2013 season of Doctor Who. Sparkle World Annual 2013 is the sparkliest annual around and is packed full of stories, activities and games featuring all your favourite characters including Strawberry Shortcake, Yoo-Hoo & Friends, Barbie, My Little Pony, Polly Pocket, Rainbow Magic Littlest Pet Shop, Puppy In My pocket, the Sparkle Girls and many more! Gould's final essay collection is based on his remarkable series for Natural History magazine—exactly 300 consecutive essays, with never a month missed, published from 1974 to 2001. Both an intellectually thrilling journey into the nature of scientific discovery and the most personal book he ever published. Complete proceedings of the 2nd European Conference on Social Media Porto Portugal Published by Academic Conferences and Publishing International Limited This volume, covering metals and minerals, contains chapters on approximately 90 commodities. In addition, this volume has chapters on mining and quarrying trends and on statistical surveying methods used by Minerals Information, plus a statistical summary. Tori Vega has always lived in the shadow of her diva-like sister Trina, who attends the very cool and exclusive stage school, Hollywood Arts. But when Trina falls victim to a food allergy just as she's about to sing in her school's concert, it's up to Tori to save the show. Tori rocks the solo with her amazing voice, and is immediately accepted into Hollywood Arts! But a new school

brings new drama ? and although Tori makes great friends and even meets a very cute boy, there's one girl who isn't exactly Tori's biggest fan ... With character profiles, puzzles, and quizzes, this annual captures all the fashion, the music and the comedy from the hit show! An all new Club Penguin Annual jam packed with games and stories from your favourite snow-covered virtual world! Featuring awesome activities, penguin pleasing puzzles, hilarious comics and all your favourite characters from [www.clubpenguin.com](http://www.clubpenguin.com)! Highly collectable and the perfect stocking filler for Club Penguin fans everywhere!

Plant Breeding Reviews presents state-of-the-art reviews on plant genetics and the breeding of all types of crops by both traditional means and molecular methods. Many of the crops widely grown today stem from a very narrow genetic base; understanding and preserving crop genetic resources is vital to the security of food systems worldwide. The emphasis of the series is on methodology, a fundamental understanding of crop genetics, and applications to major crops. It is a serial title that appears in the form of one or two volumes per year. This volume, covering metals and minerals, contains chapters on approximately 90 commodities. In addition, this volume has chapters on mining and quarrying trends and on statistical surveying methods used by Minerals Information, plus a statistical summary. The classic primer for its subject, *Housing Policy in the United States*, has been substantially revised in the wake of the 2007 near-collapse of the housing market and the nation's recent signs of recovery. Like its previous editions, this standard volume offers a broad overview of the field, but expands to include new information on how the crisis has affected the nation's housing challenges, and the extent to which the federal government has addressed them. Schwartz also includes the politics of austerity that has permeated almost all aspects of federal policymaking since the Congressional elections of 2010, new initiatives to rehabilitate public housing, and a new chapter on the foreclosure crisis. The latest available data on

housing conditions, housing discrimination, housing finance, and programmatic expenditures is included, along with all new developments in federal housing policy. This book is the perfect foundational text for urban studies, urban planning, social policy, and housing policy courses. Core Tax Annuals Full Set includes 6 Core Tax Annuals plus CD-ROM and are all fully updated to the latest Finance Act. Great value in-depth tax guides that cover all facets of UK taxation. This set of Core Tax Annuals are written by Bloomsbury Professional's leading UK tax authors. There is no compromise on content or quality, each book examines the latest legislation and tax developments in detail. User-friendly and accessible, they show how to apply the new 2013/14 tax opportunities to your clients' financial affairs. Full set includes: Corporation Tax 2013/14 by Donald Drysdale Capital Gains Tax 2013/14 by Rebecca Cave and Iris Wunschmann-Lyall Income Tax 2013/14 by Sarah Laing Inheritance Tax 2013/14 by Mark McLaughlin, Iris Wunschmann-Lyall and Chris Erwood Trusts and Estates 2013/14 by Iris Wunschmann-Lyall and Chris Erwood Value Added Tax 2013/14 by Andrew Needham PLUS a fully searchable CD-Rom containing the text from this year's titles plus content from the previous four years' editions. Previous ISBN: 9781847669544

The public health footprint associated with corporate behavior has come under increased scrutiny in the last decade, with an increased expectation that private profit not come at the expense of consumer welfare. Consumers, Corporations, and Public Health assembles 17 case studies at the intersection of business and public health to illustrate how each side can inform and benefit the other. Through contemporary examples from a variety of industries and geographies, this collection provides students with an appreciation for the importance of consumer empowerment and consumer behavior in shaping both health and corporate outcomes. Active botanical ingredients are a prime requirement for herbal formulations and discovering a drug is all about integration of

science disciplines. In recent decades there has been a growing interest in treating wounds and diseases using traditional remedies based on local herbs, combined with chemical advances. Although this has led to the development of new bioactive ingredients from plants, there has been little success in terms of clinical trials and post-marketing studies to comply with FDA guidelines. Plants have been used as a source of medicine throughout history and continue to serve as the basis for many pharmaceuticals used today. However, despite the modern pharmaceutical industry being founded on botanical medicine, synthetic approaches to drug discovery have now become standard. Science-driven translational discovery and botanical development has created a new reality, leading to enormous changes in strategies, technologies and the disciplines involved, which have been embraced by the pharmaceutical and biotech industries. This book gathers scientific expertise and traditional knowledge to promote the discovery and development of new formulations and drugs based on active ingredients and to provide guidance on taking these to clinical trials. It discusses major topics, such as how the phytochemical composition of many plants has changed over time due to factors like cultivation, which can have both positive and negative effects on the levels of bioactive compounds. It also explores the importance of plants as a valuable source of therapeutic compounds as a result of their vast biosynthetic capacity, and classifies them according to their intended use, safety and regulatory status. Further, the book offers insights into the regulatory aspects of botanical products, which is an important issue when considering standardization and quality assessment, and also examines the commercial aspects of plant-derived medications and their proven role in the treatment of chronic diseases such as heart disease, high blood pressure, pain, asthma, and other associated conditions. Given its scope, this book is a valuable tool for botanists, natural product chemists, pharmacologists and microbiologists involved in the study of

phytochemicals for drug discovery. South Africa's fynbos region has intrigued biologists for centuries. It has achieved iconic status as a locus of megadiversity and therefore a place to study the ecological underpinnings of massive evolutionary radiations. Researchers have made great advances over the past two decades in unravelling the complexities of fynbos ecology and evolution, and the region has contributed significant insights into the adaptive radiations of large lineages, conservation science, pollination biology, invasive plant biology, and palaeoanthropology. Lessons from the fynbos offer much of value for understanding the origin, maintenance, and conservation of diversity anywhere in the world. This book provides the first synthesis of the field for 20 years, bringing together the latest ecological and evolutionary research on the South African global biodiversity hotspots of the Greater Cape Floristic Region - the iconic fynbos and succulent karoo. It explores the historical and modern physical and biological environment of this region, the circumstances and processes which have fostered its remarkable biodiversity, and the role this diversity has played in the emergence of modern humans. It also discusses the challenges of contemporary management and conservation of the region's biodiversity in the face of accelerating global change. "As our vision becomes more global, our storytelling is stretching in many ways. Stories increasingly change point of view, switch location, and sometimes pack as much material as a short novel might," writes guest editor Elizabeth Strout. "It's the variety of voices that most indicates the increasing confluence of cultures involved in making us who we are." The Best American Short Stories 2013 presents an impressive diversity of writers who dexterously lead us into their corners of the world. In "Miss Lora," Junot Díaz masterfully puts us in the mind of a teenage boy who throws aside his better sense and pursues an intimate affair with a high school teacher. Sheila Kohler tackles innocence and abuse as a child wanders away from her mother, in thrall to a stranger she believes is the "Magic Man." Kirstin Valdez Quade's

“Nemecia” depicts the after-effects of a secret, violent family trauma. Joan Wickersham’s “The Tunnel” is a tragic love story about a mother’s declining health and her daughter’s helplessness as she struggles to balance her responsibility to her mother and her own desires. New author Callan Wink’s “Breatharians” unsettles the reader as a farm boy shoulders a grim chore in the wake of his parents’ estrangement. “Elizabeth Strout was a wonderful reader, an author who knows well that the sound of one’s writing is just as important as and indivisible from the content,” writes series editor Heidi Pitlor. “Here are twenty compellingly told, powerfully felt stories about urgent matters with profound consequences.” When Eric Toensmeier and Jonathan Bates moved into a duplex in a run-down part of Holyoke, Massachusetts, the tenth-of-an-acre lot was barren ground and bad soil, peppered with broken pieces of concrete, asphalt, and brick. The two friends got to work designing what would become not just another urban farm, but a "permaculture paradise" replete with perennial broccoli, paw paws, bananas, and moringa—all told, more than two hundred low-maintenance edible plants in an innovative food forest on a small city lot. The garden—intended to function like a natural ecosystem with the plants themselves providing most of the garden's needs for fertility, pest control, and weed suppression—also features an edible water garden, a year-round unheated greenhouse, tropical crops, urban poultry, and even silkworms. In telling the story of Paradise Lot, Toensmeier explains the principles and practices of permaculture, the choice of exotic and unusual food plants, the techniques of design and cultivation, and, of course, the adventures, mistakes, and do-overs in the process. Packed full of detailed, useful information about designing a highly productive permaculture garden, Paradise Lot is also a funny and charming story of two single guys, both plant nerds, with a wild plan: to realize the garden of their dreams and meet women to share it with. Amazingly, on both counts, they succeed. Soil erosion by wind is significant to

Earth systems and human health. There is a strong interest in understanding the factors and processes of soil erosion by wind as well as in developing and applying methods to control dust emission from soils and to stabilize active sands. The Special Issue contains information on applications of natural and synthetic materials to reduce soil erosion, development of materials and methods, experimental methods and modeling, impacts on the soil quality and the environments, and quantification of the efficiency in dust control and sand stabilization applications.

**No Marketing Blurb** This volume contains peer-reviewed papers from the Fourth World Landslide Forum organized by the International Consortium on Landslides (ICL), the Global Promotion Committee of the International Programme on Landslides (IPL), University of Ljubljana (UL) and Geological Survey of Slovenia in Ljubljana, Slovenia from May 29 to June 2, 2017. The complete collection of papers from the Forum is published in five full-color volumes. This fourth volume contains the following:

- Earthquake-Induced Landslides
- Rainfall-Induced Landslides
- Rapid Landslides: Debris Flows, Mudflows, Rapid Debris-Slides
- Landslides in Rocks and Complex Landslides: Rock Topples, Rock Falls, Rock Slides, Complex Landslides
- Landslides and Other Natural Hazards: Floods, Droughts, Wildfires, Tsunamis, Volcanoes

Prof. Matjaž Mikoš is the Forum Chair of the Fourth World Landslide Forum. He is the Vice President of International Consortium on Landslides and President of the Slovenian National Platform for Disaster Risk Reduction. Prof. Nicola Casagli is Founding member of the International Consortium on Landslides (ICL), professor at the University of Florence and founder of the UNESCO Chair on geohydrological hazards at the same University. Prof. Yueping Yin is the President of the International Consortium on Landslides and the Chairman of the Committee of Geo-Hazards Prevention of China, and the Chief Geologist of Geo-Hazard Emergency Technology, Ministry of Land and Resources, P.R. China". Prof.

Kyoji Sassa is the Founding President of the International Consortium on Landslides(ICL). He is Executive Director of ICL and the Editor-in-Chief of International Journal“Landslides” since its foundation in 2004. IPL (International Programme on Landslides) is a programme of the ICL. The programme is managed by the IPL Global Promotion Committee including ICL and ICL supporting organizations, UNESCO, WMO, FAO, UNISDR, UNU, ICSU, WFEO, IUGS and IUGG. TheIPL contributes to the United Nations International Strategy for Disaster Reduction and the ISDR-ICL Sendai Partnerships 2015-2025. "A do-it-yourself guide for health & natural living"--Cover. This fantastic annual is brought to you by the best-loved characters from the number one award-winning preschool children's TV show on Channel 5 and Nickelodeon - Peppa Pig. Full of piggy tales, puzzles, games and activities and lots of stickers! This Annual is the perfect gift for Star Wars fans this Christmas! ? Taking a look back at the 40-year saga, this book contains story moments from all the films, including The Last Jedi and Solo, plus fun facts from The Clone Wars and Rebels. Relive your favourite scenes, read about the most influential characters, the top ships and droids, and recap on four decades of Star Wars adventures. This Annual includes activities, colouring pages and puzzles to complete, plus posters of favourite characters.

You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>. Terence Kilbourne Hopkins (1929-1997) was a hidden gem of the field of world-systems studies who contributed indispensably to its foundation amid a lifelong collaboration and friendship with Immanuel Wallerstein. His pedagogical humanism, methodological rigor, and scientific commitment to social change, merged with his creatively flexible administrative skills to found the Graduate Program in Sociology at Binghamton University (SUNY). The student-centered, autonomous program fostered the formation of critically-minded scholars who pursue transdisciplinary sociology while fusing deeply personal commitments to long-term, large-scale social change. In this significantly updated twentieth anniversary second edition of *Mentoring, Methods, and Movements*, Terence K. Hopkins’s former students organizing and contributing to a colloquium in his honor a few months before his untimely passing in January 1997 share key insights about what made him so unique and impactful in shaping their practices of engaged sociology—informed by an always open, dynamic, and self-reinventing World-Systems Analysis. The new edition includes a comprehensive chronological works/citations bibliography of Terence K. Hopkins, a new postscript essay

reflecting and building on other contributions in the volume, updates on the contributors' background and works, a reorganized photo gallery and cover design, and a detailed subject index that can be a helpful guide to the many aspects of Hopkins's thought and pedagogy from the points of view of his students/colleagues. From the Inside "For several years now we sociologists have heard much talk about structure and agency .... This distinction can make little sense to students of Hopkins, who always insisted that social structures are formed, reproduced, and reformed by the agency of actors. ..." -Walter Goldfrank, U.C. Santa Cruz "How did Terry do it?" -William G. Martin, Binghamton University "Hopkins's insistent questioning opened the door to the creation of an alternate apparatus of discourse, the very flexibility of which allows the emerging debates of world-scale historical social sciences to be joined ...." -Ravi A. Palat, Binghamton University "... Hopkins was attacking the idiographic-nomothetic distinction through the pedagogy. The pedagogy assumed that the student had to work hard as a student "inventing" and then had to continue inventing forever after." -Immanuel Wallerstein, Yale University "But then again I cannot think of a better way to reflect on Hopkins's work than approaching it from a personal perspective. That is how he always approached his own work, after all, and he encouraged us to do so as well." -Resat Kasaba, University of Washington "... The vision of methods Terence Hopkins has offered includes this invitation to a special sort of imaginative social action: think the past to make a past with the purpose of making the future by thinking a future." - Richard Lee, Binghamton University "This is not going to be a personal speech, but the invisible hand of Terence K. Hopkins lies about me and in most of what I've written since I left Binghamton. ... " -Philip McMichael, Cornell University "The study of regionalism vis-a-vis globalism parallels the two poles of Terence Hopkins's own intellectual development which began with the study of small group interaction and culminated with a focus on the

dynamics of the world-system. ..." -Elizabeth McLean Petras, Scholar and Author "... even the Hopkins phrases were not immune to skeptical support. Exhibiting his characteristic penchant for sustained auto-critique, Hopkins wrote in the margins of the paper ..." -Beverly Silver, Johns Hopkins University "... He was a tireless and merciless critic. Yet I never felt demeaned or belittled. ... He pounded home time and again that it was not helpful to view race and class as binary opposites, ...." -Rod Bush (1945-2013), St. John's University "... key points in the work of Hopkins elucidate productive ways of meeting the criteria set by feminists for the study of gender. ...World-systems analysis has thus far not dealt with subjective and objective, self and society as dimensions of the modern world-system. Critique of these as discrete units of analysis is implicit in world-systems analysis, but focused attention on these is the contribution of feminist theory to the discussion of unit of analysis."-Nancy Forsythe, Feminist Scholar and Activist "... The time I was fortunate to spend with him allowed me to have a sense of his profound concern about the welfare of humanity and commitment to the cause of the unprivileged ...." -Lu Aiguo, Inst. of World Economies and Politics, Chinese Academy of Social Science, Beijing "It was not what Hopkins actually said to me that mattered, not his educational program nor even his parenthetical letters, but what he is (and now what he was), a style of being alive, a magical dance he does with his body or with you or with parts of who he was ... a dance in which he laughs, turning away just enough to help you see it is not you he is laughing at, but us." -Evan Stark, Rutgers University "Gathered in this volume ... are sociologically imaginative world-systems analyses of Terence K. Hopkins, amid the world-historical public issues that deeply troubled him personally and are even more prevalent today." -Mohammad H. Tamdgidi, UMass Boston /OKCIR Colourful, fun and packed with top characters from favourite shows, the new Disney Junior Annual 2013 is the perfect entertainment for any young child. There are

lovely picture stories to enjoy, simple puzzles to solve and lots of creative colourings. A special teaser for Peter Jackson's film "The Hobbit: An Unexpected Journey" Nopening in theaters on December 14Nin the form of a children's activity book, featuring photos and puzzles throughout. Full color. Consumable. 'Smash Hits Presents One Direction Special Annual 2015'. Featuring cool profiles, crazy facts, gossip, loads of hunky photos, plus a free mask, diehard fans will have their heart set-on receiving this 'Special' editorial Annual at Christmas. Real Estate Marketing is specifically designed to educate real estate students with the art and science of the real estate marketing profession. The ideal textbook for undergraduate and graduate level classes in business school and professional / continuing education programs in Real Estate, this book will also be of interest to professional real estate entrepreneurs looking to boost their knowledge and improve their marketing techniques. The book is divided into five major parts. Part 1 focuses on introducing students to fundamental concepts of marketing as a business philosophy and strategy. Concepts discussed include strategic analysis, target marketing, and the four elements of the marketing mix: property planning, site selection, pricing of properties, and promotion of properties. Part 2 focuses on personal selling in real estate. Students will learn the exact process and steps involved in representing real estate buyers and sellers. Part 3 focuses on negotiations in real estate. How do effective real estate professionals use negotiation approaches such as collaboration, competition, accommodation, and compromise as a direct function of the situation and personalities involved in either buying or selling real estate properties? Part 4 focuses on human resource management issues such as recruiting and training real estate agents, issues related to performance evaluation, motivation, and compensation, as well as issues related to leadership. Finally, Part 5 focuses on legal and ethical issues in the real estate industry. Students will learn how to address difficult situations and legal/ethical dilemmas by

understanding and applying a variety of legal/ethical tests. Students will also become intimately familiar with the industry's code of ethics. In the age of economic globalisation, do art and heritage matter? Once the domain of elitist practitioners and scholars, the governance of cultural heritage and the destiny of iconic artefacts have emerged as the new frontier of international law, making headlines and attracting the varied interests of academics and policy-makers, museum curators and collectors, human rights activists and investment lawyers and artists and economists, just to mention a few. The return of cultural artefacts to their legitimate owners, the recovery of underwater cultural heritage and the protection and promotion of artistic expressions are just some of the pressing issues addressed by this book. Contemporary intersections between art, cultural heritage and the market are complicated by a variety of ethical and legal issues, which often describe complex global relations. Should works of art be treated differently from other goods? What happens if a work of art, currently exhibited in a museum, turns out to have originally been looted? What is the relevant legal framework? What should be done with ancient shipwrecks filled with objects from former colonies? Should such objects be kept by the finders? Should they be returned to the country of origin? This book addresses these different questions while highlighting the complex interplay between legal and ethical issues in the context of cultural governance. The approach is mainly legal but interdisciplinary aspects are considered as well.
